

The amount of carbon sequestered each year by forests managed by Texas A&M Forest Service is equivalent to the amount of carbon emitted from the gasoline needed to

# DRIVE A VEHICLE AROUND THE WORLD OVER 13,000 TIMES

Texas A&M Forest Service manages nearly 12,000 acres of state forest and General Land Office tracts. By actively managing these public lands to promote forest health, vigor and resiliency to environmental stressors like wildfire and insects, TFS invests in long-term carbon sequestration.
