

# TEXAS TIMBER PRICE TRENDS

## Market Overview\*

U.S. housing starts were sluggish due to adverse winter weather conditions. Single-family home construction declined 14.9% between January and February. However, an increase in building permits suggests stronger future demand for housing in the U.S. Lower oil and energy prices are still a concern for the Texas economy in 2015. A reporter noted that mill inventories remained full despite the wet ground conditions in East Texas.

Statewide pine sawlog prices averaged \$29.72 per ton, up 5% from last period and up 24% from the price a year ago. Average pine sawlog price was \$27.10 per ton in Northeast Texas and \$30.06 per ton in Southeast Texas.

The statewide average pine pulpwood price was \$9.21 per ton. This was down 5% from last period and up 4% from the price a year ago. In Northeast Texas, the average pine pulpwood price was \$9.16 per ton. It was \$9.23 per ton in Southeast Texas.

Small diameter pine sawlogs (CNS) averaged \$16.71 per ton statewide, up 12% from last period. It was up 44% from the price a year ago.

The statewide average mixed hardwood sawlog price was \$38.24 per ton, 1% higher than last period and 30% higher than the price a year ago.

The average hardwood pulpwood price was

\$15.74 per ton, 47% higher than last period. In Northeast Texas, the average price was \$17.43 per ton. It was \$12.44 per ton in Southeast Texas.

\*The average prices reported here represent statewide volumes of 157,883 tons of pine sawlogs, 489,017 tons of pine pulpwood, 99,792 tons of pine CNS, 3,376 tons of mixed hardwood sawlogs, and 16,328 tons of hardwood pulpwood during January/February 2015.

1. Stumpage price statistics include gatewood sales. Stumpage prices for gatewood sales are estimated by subtracting cut-and-haul costs, other expenses, and profits provided by reporter.
2. Price is calculated from a specific conversion factor reported for each sale if available; otherwise, the average conversion factors listed on page 4 are used. MBF = Thousand Board Feet. The DOYLE LOG SCALE is used for board foot measurements.
3. Statewide data excludes U.S. Forest Service sales.
4. \*\* indicates insufficient sales to report price statistics (less than three sales).
5. Prices listed for previous periods may differ from previously published values because additional data have been received.
6. Price change in percentage is calculated based on price in ton.
7. Extreme outliers from reported data are detected and filtered out based on statistical methods.

*Texas Timber Price Trends* is a bi-monthly publication reporting average prices paid for standing timber in Texas.

***This report is intended only as a guide to general price levels.*** Individuals inter-

ested in buying and selling timber can use this report to monitor market trends and get a general idea of what timber is worth. However, it should not be used to judge the fair market value of a specific timber sale, which may vary considerably due to many factors.

#### **HOW ARE AVERAGE PRICES CALCULATED?**

Data published in this report are from actual timber sales as reported by as many as 60 cooperators active in the East Texas timber market. Reporters include forest product companies, logging contractors, consulting foresters, family forest landowners, financial institutions, and federal agencies.

The prices are volume weighted average prices. The price per ton for each product category is as reported or using a specific conversion factor provided by the reporters. When a specific conversion factor for each sale is not available, an average conversion factor listed here is used instead.

#### **VOLUME CONVERSION FACTORS**

##### **Sawlogs & Chip-N-Saw**

Pine— 8 tons=1 MBF-Doyle

Pine CNS— 2.7 tons= 1 Cord

Hardwood— 9 tons= 1 MBF-Doyle

##### **Pulpwood**

Pine— 2.7 tons=1 Cord

Hardwood— 2.8 tons= 1 Cord
