# HIGHLIGHTS

## *Texas Forest Resource Harvest Trends 2001*

### 2001 TIMBER REMOVAL

- ◆ Total timber removal decreased 7.5 percent to 674.2 million cubic feet.
  - ◆ Pine removal was down 4 percent to 536.1 million cubic feet.
  - ◆ Hardwood removal dropped 18.9 percent to 138.1 million cubic feet.
- ◆ Harvest of timber for industrial use in the production of wood products was 599.9 million cubic feet.
  - ◆ 488.5 million cubic feet of pine was harvested for industrial consumption.
  - ◆ 111.4 million cubic feet of hardwood was harvested for industrial consumption.
- ◆ The value of timber harvested declined.
  - ◆ Stumpage value decreased 15.4 percent to \$455.8 million.
  - ◆ Delivered value was down 9.3 percent to \$849.2 million.
- ◆ Harvest of sawlogs decreased 2.5 percent to 1,487 million board feet.
- ◆ Harvest of wood for veneer and structural panel production fell 10.1 percent to 177.8 million cubic feet.
- ◆ Pulpwood harvest declined 10.1 percent to 2.2 million cords.
- ◆ Texas imported more timber than exported in 2001. The total import from other states was 85.5 million cubic feet while the total export was 75.2 million cubic feet. The net import was 1.7 percent of the total roundwood production in Texas.

### PRIMARY FOREST PRODUCTS

- ◆ Production of primary wood products included:
  - ◆ 1.51 billion board feet of lumber, a decrease of 4.6 percent.
  - ◆ 2.73 billion square feet of structural panel products, down 16.3 percent.
  - ◆ 2.68 million tons of paper and paperboard, down 10.3 percent.

### GROWTH-REMOVAL RELATIONSHIP

- ◆ Removal of pine growing stock was 86.2 percent of the estimated growth.
- ◆ Removal of hardwood growing stock was 58.2 percent of the estimated growth.

**Table 1. Total Industrial Timber Harvest Volume and Value by County in Texas, 2001**

County	Volume Harvested			Value of Harvest	
	Pine	Hardwood	Total	Stumpage Value	Delivered Value
	----- cubic feet -----			----- thousand dollars -----

<sup>1</sup>Other removals were calculated so that the annual Harvest Trends removal estimates were consistent with the Forest survey periodic estimates. Other removals for 1992 and 1993 were revised based on 1992 Forest Survey.

<sup>2</sup>1986 Forest Survey provides average annual growth and removals data for the years 1975 through 1985.

<sup>3</sup>1992 Forest Survey provides average annual growth and removals data for the years 1986 through 1991.

<sup>4</sup> growth estimates were based on Forest Survey growth data plus annual reforestation, harvest information.
